DANISH SHAIKH ASHIK ALI

Mumbai, Maharashtra, India | +91 7045686672 | danish823091@gmail.com | LinkedIn | GitHub

EDUCATION

ITM Skills University | Kharghar, Navi Mumbai, Maharashtra

***Bachelor of Technology in Computer Science and Engineering* | Expected June 2029 | Current Semester: 85%**

TECHNICAL SKILLS

Programming Languages: Python (Advanced), JavaScript, HTML/CSS, C++

AI/ML Frameworks & Libraries: PyTorch, Scikit-learn, NumPy, Pandas, Hugging Face, Ollama, OpenAI API

Tools & Technologies: Git, Gradio, LangChain, Prompt Engineering, RAG Systems

Currently Learning: AI Engineering, LLM Fine-tuning, Agentic AI Systems, MLOps, AWS Bedrock, Docker

PROJECTS

Brochure Generator | ***Python, OpenAI API, Web Scraping*** | **GitHub**

- Developed an automated marketing tool that analyzes company websites and generates professional brochures using AI
- Implemented intelligent web scraping to extract and filter relevant content, identifying key pages like 'About Us' and 'Careers'
- Utilized OpenAI's GPT models to synthesize multi-page website content into concise, markdown-formatted summaries

FlightAI - Multimodal Travel Agent | *Python, Gradio, OpenAI API, SQLite, DALL-E 3* | GitHub

- Built an interactive AI travel assistant with database integration, text-to-speech, and AI-generated imagery capabilities
- Integrated SQLite database for real-time flight pricing queries and DALL-E 3 for generating custom travel destination artwork
- Deployed interactive web interface using Gradio, featuring voice responses and visual content generation

PennyWise AI - Prompt Caching System | *Python, LiteLLM, OpenAI API, Cost Optimization* | GitHub

- Demonstrated advanced prompt caching techniques to optimize LLM API costs, achieving 10x cost reduction (from $0.53 to $0.06 per query)
- Analyzed token usage patterns using Shakespeare's Hamlet as a test dataset to validate caching efficiency for large context windows

Heart Disease Classification Model | *Python, Scikit-learn, Pandas, Matplotlib, Seaborn* | GitHub

- Developed end-to-end machine learning pipeline for heart disease prediction using medical patient data
- Performed comprehensive EDA and compared multiple classification algorithms (Logistic Regression, KNN, Random Forest)
- Implemented hyperparameter tuning using GridSearchCV and analyzed feature importance to identify key medical indicators

Bulldozer Price Prediction | *Python, Scikit-learn, Time Series Analysis, Random Forest Regression* | GitHub

- Built regression model for Kaggle competition to predict heavy equipment auction prices using time-series data
- Engineered features from messy categorical data and handled missing values through strategic imputation techniques

- Achieved competitive RMSLE score by identifying key price drivers (YearMade, ProductSize) through feature importance analysis

CERTIFICATIONS

- AI Engineering Specialization (In Progress) - 5-course series by Ed Donner covering API integration, RAG systems, fine-tuning, agentic AI, MLOps, AWS Bedrock, and Docker (Expected completion: June 2026)
- Python Programming Bootcamp - Udemy
- Machine Learning Course - Udemy

LEADERSHIP & INVOLVEMENT

Development Head | Research & Development Club, ITM Skills University | Dec 2025 - Present

- Lead technical initiatives for the university's R&D club, fostering innovation and hands-on learning
- Mentor peers in AI/ML concepts and programming, providing guidance on projects and technical problem-solving

ADDITIONAL INFORMATION

- Open to remote internship opportunities with flexible availability across time zones
- Strong foundation in AI/ML fundamentals with hands-on experience in LLM applications, RAG systems, and prompt engineering
- Passionate about continuous learning and staying current with emerging AI technologies and best practices
